

Modernize Your Data Estate with a **Databricks MVP**

Modernizing your data estate gives your team trustworthy insights, streamlines operations, and enables faster data-driven decisions. But complexity—from scattered sources to outdated architectures—can slow you down.

WinWire's Databricks MVP Offer - 4 Weeks

Envision jumpstarting your data modernization journey within a month—without the prolonged uncertainties. WinWire's Databricks MVP Offer provides a guided path to a modern data architecture using the Medallion Lakehouse approach. **In just 4 weeks**, we'll set up your Databricks environment, ingest two targeted datasets, load historical data into the Lakehouse, build out two meaningful dashboards with their semantic models & lay the blueprint for future growth—all on your chosen cloud tenant.

Assessment and Services set up - Week 1

Collaborate on scope, finalize data sources, identify dashboard needs, and set up your Databricks workspace.

Build and Test - Week 2 & 3

Design ingestion pipelines and a Medallion Lakehouse (Bronze-Silver-Gold layers), build semantic models and develop initial dashboards.

Roadmap - Week 4

Showcase the solution, refine insights, discuss business impact, and align on a strategic roadmap.

← Duration : 4 Weeks →

Business Value

Faster insights

Accelerate time-to-value by quickly enabling faster data processing and analytics

Informed decision-making

Establish a single source of truth for reliable, consistent and trusted data-driven strategies.

Future-proof architecture

Build a scalable blueprint that fosters collaboration & enables self-service to a changing business landscape.

Ready to transform uncertainty into clarity?

Let's start a conversation—see how WinWire's Databricks MVP Offer can quickly drive your data modernization journey. We're here to help you turn complex data challenges into actionable insights—within just four weeks.
